# Mini Packages Great Things

## MINI-LED X

Take contrast to the final extreme with extreme brights and haunting blacks so detailed you can tell the shades apart, and all the fantastic details in between. Make out the arms of a snowflake, or the fuzz on a sweater, and every other detail you may have missed, for a picture that truly breaks the limits of reality with over 5000 full array local dimming zones.

*\*UX models only*

## MINI-LED

Hisense's Mini-LED setup improves on these LEDs, resulting in breathtaking detail on screen. Tightly grouped LEDs for an infinitely more precise backlight and better contrast control. Additionally, the mini-LEDs emit light in a line, instead of a diffuse cone which also improves precision. Utilize up to 1,200+ local dimming zones for improved contrast and a crisp, vivid picture.

Mini-LED X

Mini-LED

# Intelligent Brain

## HI-VIEW ENGINE X

Hisense's state-of-the-art proprietary Hi-View Engine X takes full control of your TV for a stress-free experience that will remain relevant for years to come with the future in mind. Its 12-bit computing power allows it to output up to 4096 brightness levels with breathtaking visual quality for a truly optimized viewing experience.

## HI-VIEW ENGINE

Hisense's Hi-View Engine is both the brains and the muscle that keeps your TV running smoothly. A powerful neural network consistently optimizes your viewing experience with real-time frame-level analysis to ensure you're experiencing the optimal audiovisual journey.

Hi-View  
Engine X

Hi-View  
Engine

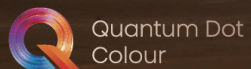

# Billions of Colours

## QUANTUM DOT COLOUR

Quantum Dot TVs boast one of the most efficient technologies for bright, precise color. By using quantum dots to emit extremely precise wavelengths of light, Quantum Dot Color creates the possibility of witnessing billions of new shades at incredibly impressive levels of brightness. This all results in a significant color volume for an array of colors that borders on the impossible.

## WIDE COLOR GAMUT

Today our ability to mimic our innate color perception is better than ever. Hisense TVs boast a wide color gamut, capable of differentiating more unique colors spanning a larger range of the spectrum, with a screen that's more vibrant, vivid, and precise than ever before, inching our way toward a picture quality that pushes the boundaries of reality.

# Maintain Competitive Edge

## 144Hz GAME MODE PRO

Slide into first place with 144Hz Game Mode PRO; all the game-ready features you'll need for the optimal gaming experience. Ultra-precise variable refresh rate (VRR), and auto low latency mode (ALLM) come together at an astounding 144Hz for a smooth gaming experience that'll remain competitive for years. Capture every movement on screen to ensure your final step to victory.

\*Selected models only

## HSR 120 ULTRA MOTION

With a native 120 HSR, even the most dynamic objects appear bright, fluid, and crystal clear. Hisense TVs identify the tiniest details and intuitively remove any noise to clear up fast-moving objects, while also inserting transitional frames into your favorite content when its needed, for a perfectly fluid and seamless viewing experience.

# Immersed in Crystal-clear Sound

## CINESTAGE 4.1.2 X SURROUND

Satisfy your desires of a beautiful design and stunning picture quality, without compromising on audio bliss. The UX boast an impressive speaker setup with a special side-speaker design, and rear-mounted subwoofer, with a powerful decoder for an immersive 4.1.2 surround sound experience without relying on a complicated external speaker setup. CineStage X activates all your senses and unlocks the full potential of your audiovisual experience.

*\*UX models only*

## IMMERSED IN CRYSTAL-CLEAR SOUND

Developed by Hisense R&D, perfect combine with hardware, ensure consumers crystal-clear audio quality, surround and immersed in the action, hear and enjoy in every emotion.
